

Volodymyr Samotii

Backend Engineer | Node.js, TypeScript, PostgreSQL | Scalable APIs | Full-Stack Experience
+1 (780) 919-2558 | Edmonton, AB (Alberta) | volodymyr.samotii@gmail.com | [LinkedIn](#)

Summary

Backend Engineer with 2+ years of experience building scalable APIs and data-driven systems using Node.js and TypeScript. Experienced in designing REST and GraphQL APIs, optimizing database performance (PostgreSQL, MongoDB), and working with cloud infrastructure (AWS, Docker, CI/CD) in production environments. .

Improved backend **performance by up to 15–20%** and worked with systems **handling 10K+** users.

Open to backend engineering opportunities in Canada.

Skills

Languages: JavaScript, TypeScript.

Backend: Node.js, NestJS, Express.

Frontend: React, Next.js.

Databases: PostgreSQL, MongoDB, MySQL.

ORMs: TypeORM, Prisma, Mongoose.

Cloud & DevOps: AWS (S3, EC2, Lambda), Docker, CI/CD (GitHub Actions).

APIs: REST, GraphQL.

Auth: JWT, OAuth, Auth0.

Tools: Git, Postman, Swagger, Jira.

Languages: English (Advanced), Ukrainian (Native).

Education

Bachelor of Science in Applied Mathematics
Ivan Franko National University of Lviv

Professional Experience

HRQualifier, Ukraine(Remote)

Oct 2025 - present

Full Stack developer

- Implemented permission-based authorization, **improving access control and security**
- Developed and optimized **GraphQL APIs** using **NestJS and PostgreSQL**
- Improved API performance and reduced response time through query optimization
- Worked on backend architecture and database interactions
- Built reusable UI components using **React and TypeScript** to support frontend functionality

Tools and technologies: React, SCSS, Tailwind, AntDesign, Nest.js, TypeORM, PostgreSQL, GraphQL, RestAPI

Confidential project (NDA), Ukraine,USA(Remote)

June 2025 - Aug 2025

Backend engineer (Node.js)

- Designed GraphQL mutations supporting 10K+ concurrent users
- Migrated CI/CD pipelines from **Jenkins to Harness**, improving deployment efficiency
- Refactored backend code, **improving performance by 15%** and reducing latency

Tools and technologies: Node.js, TypeScript, GraphQL, AWS, Docker, Harness, Jenkins.

Incode group, Kyiv,Ukraine(Remote)

Aug 2023 - Apr 2025

Full Stack Developer (Backend-focused)

- Integrated third-party APIs (**Stripe, RevenueCat, Keycloak, Supabase, QuickChart**) to extend product functionality.
- Implemented authentication and authorization (JWT, OAuth) ensuring secure access management.
- Optimized **SQL & NoSQL** databases, improving query performance and system scalability. Integrated **AWS S3** for storing and processing binary data.
- Refactored** legacy codebase, reducing duplications and simplifying future integrations.
- Designed a flexible database schema supporting multiple content sources (Google Docs, Markdown, GitHub) and destinations (WordPress, Apple News, Webflow).
- Resolved **GraphQL** issues and improved schema stability.
- Designed background processing system for video handling (frame extraction, thumbnail generation, S3 upload). Optimized API response times and reduced database complexity.
- Set up and maintained CI/CD pipelines using **GitHub Actions**, improving deployment reliability

Tools and technologies: Node.js, TypeScript, NestJS, React, GraphQL, PostgreSQL, MongoDB, MySQL, AWS, Docker, GitHub Actions
